THE HOUSE OF AL JOUHARI

Where structure meets *craft.*

Since 1999, Al Jouhari Technical Services has built across the Emirates: industrial floors, steel structures, waterproofing and fine finishing for some of the region's most demanding clients. Our residential collections bring that same discipline home.

Every trade sits under one roof, with one team accountable from the first site visit to the final handover. No chasing subcontractors, no gaps between scopes.

THIS CATALOGUE

Pools designed for the way families live outdoors, and built by the team that pours the shell, seals it and lays the final stone.

Inside: two design studies and five pool designs, including family pools with an integrated children's area; each design followed through six construction milestones; and the outdoor living that completes the setting around the water.

CONTENTS

In this *catalogue*

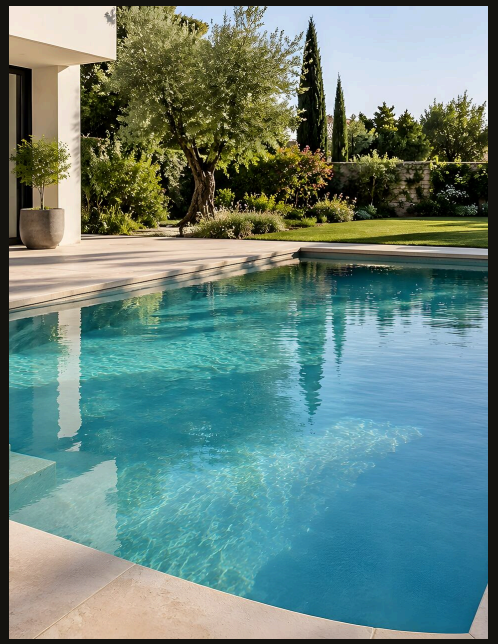

01 **Design inspiration** 04
Two natural-light pool studies

02 **The pool designs** 06
Five designs, two with integrated children's areas

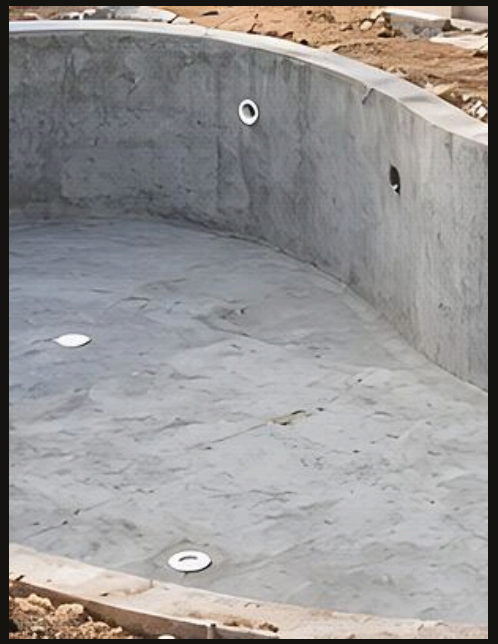

03 **The build** 11
Six designs, stage by stage

04 **Outdoor living** 18
Pergolas, lounges and evening light

05 **How we work** 19
From first visit to first swim

01

DESIGN INSPIRATION · 01

Compact courtyard pool

A compact square pool with broad entry steps and a natural stone setting.

- BROAD ENTRY STEPS
- NATURAL STONE SETTING
- COURTYARD SCALE

02

DESIGN INSPIRATION · 02

Contemporary garden pool

An elongated pool framed by pale paving and soft garden planting.

- ELONGATED PLAN
- PALE STONE PAVING
- GARDEN PLANTING

POOL DESIGN · 01

Family pool, *side zone*

A shallow children's area integrated beside the main swimming zone.

- SHALLOW CHILDREN'S AREA
- MAIN SWIMMING ZONE
- INTEGRATED STEPS

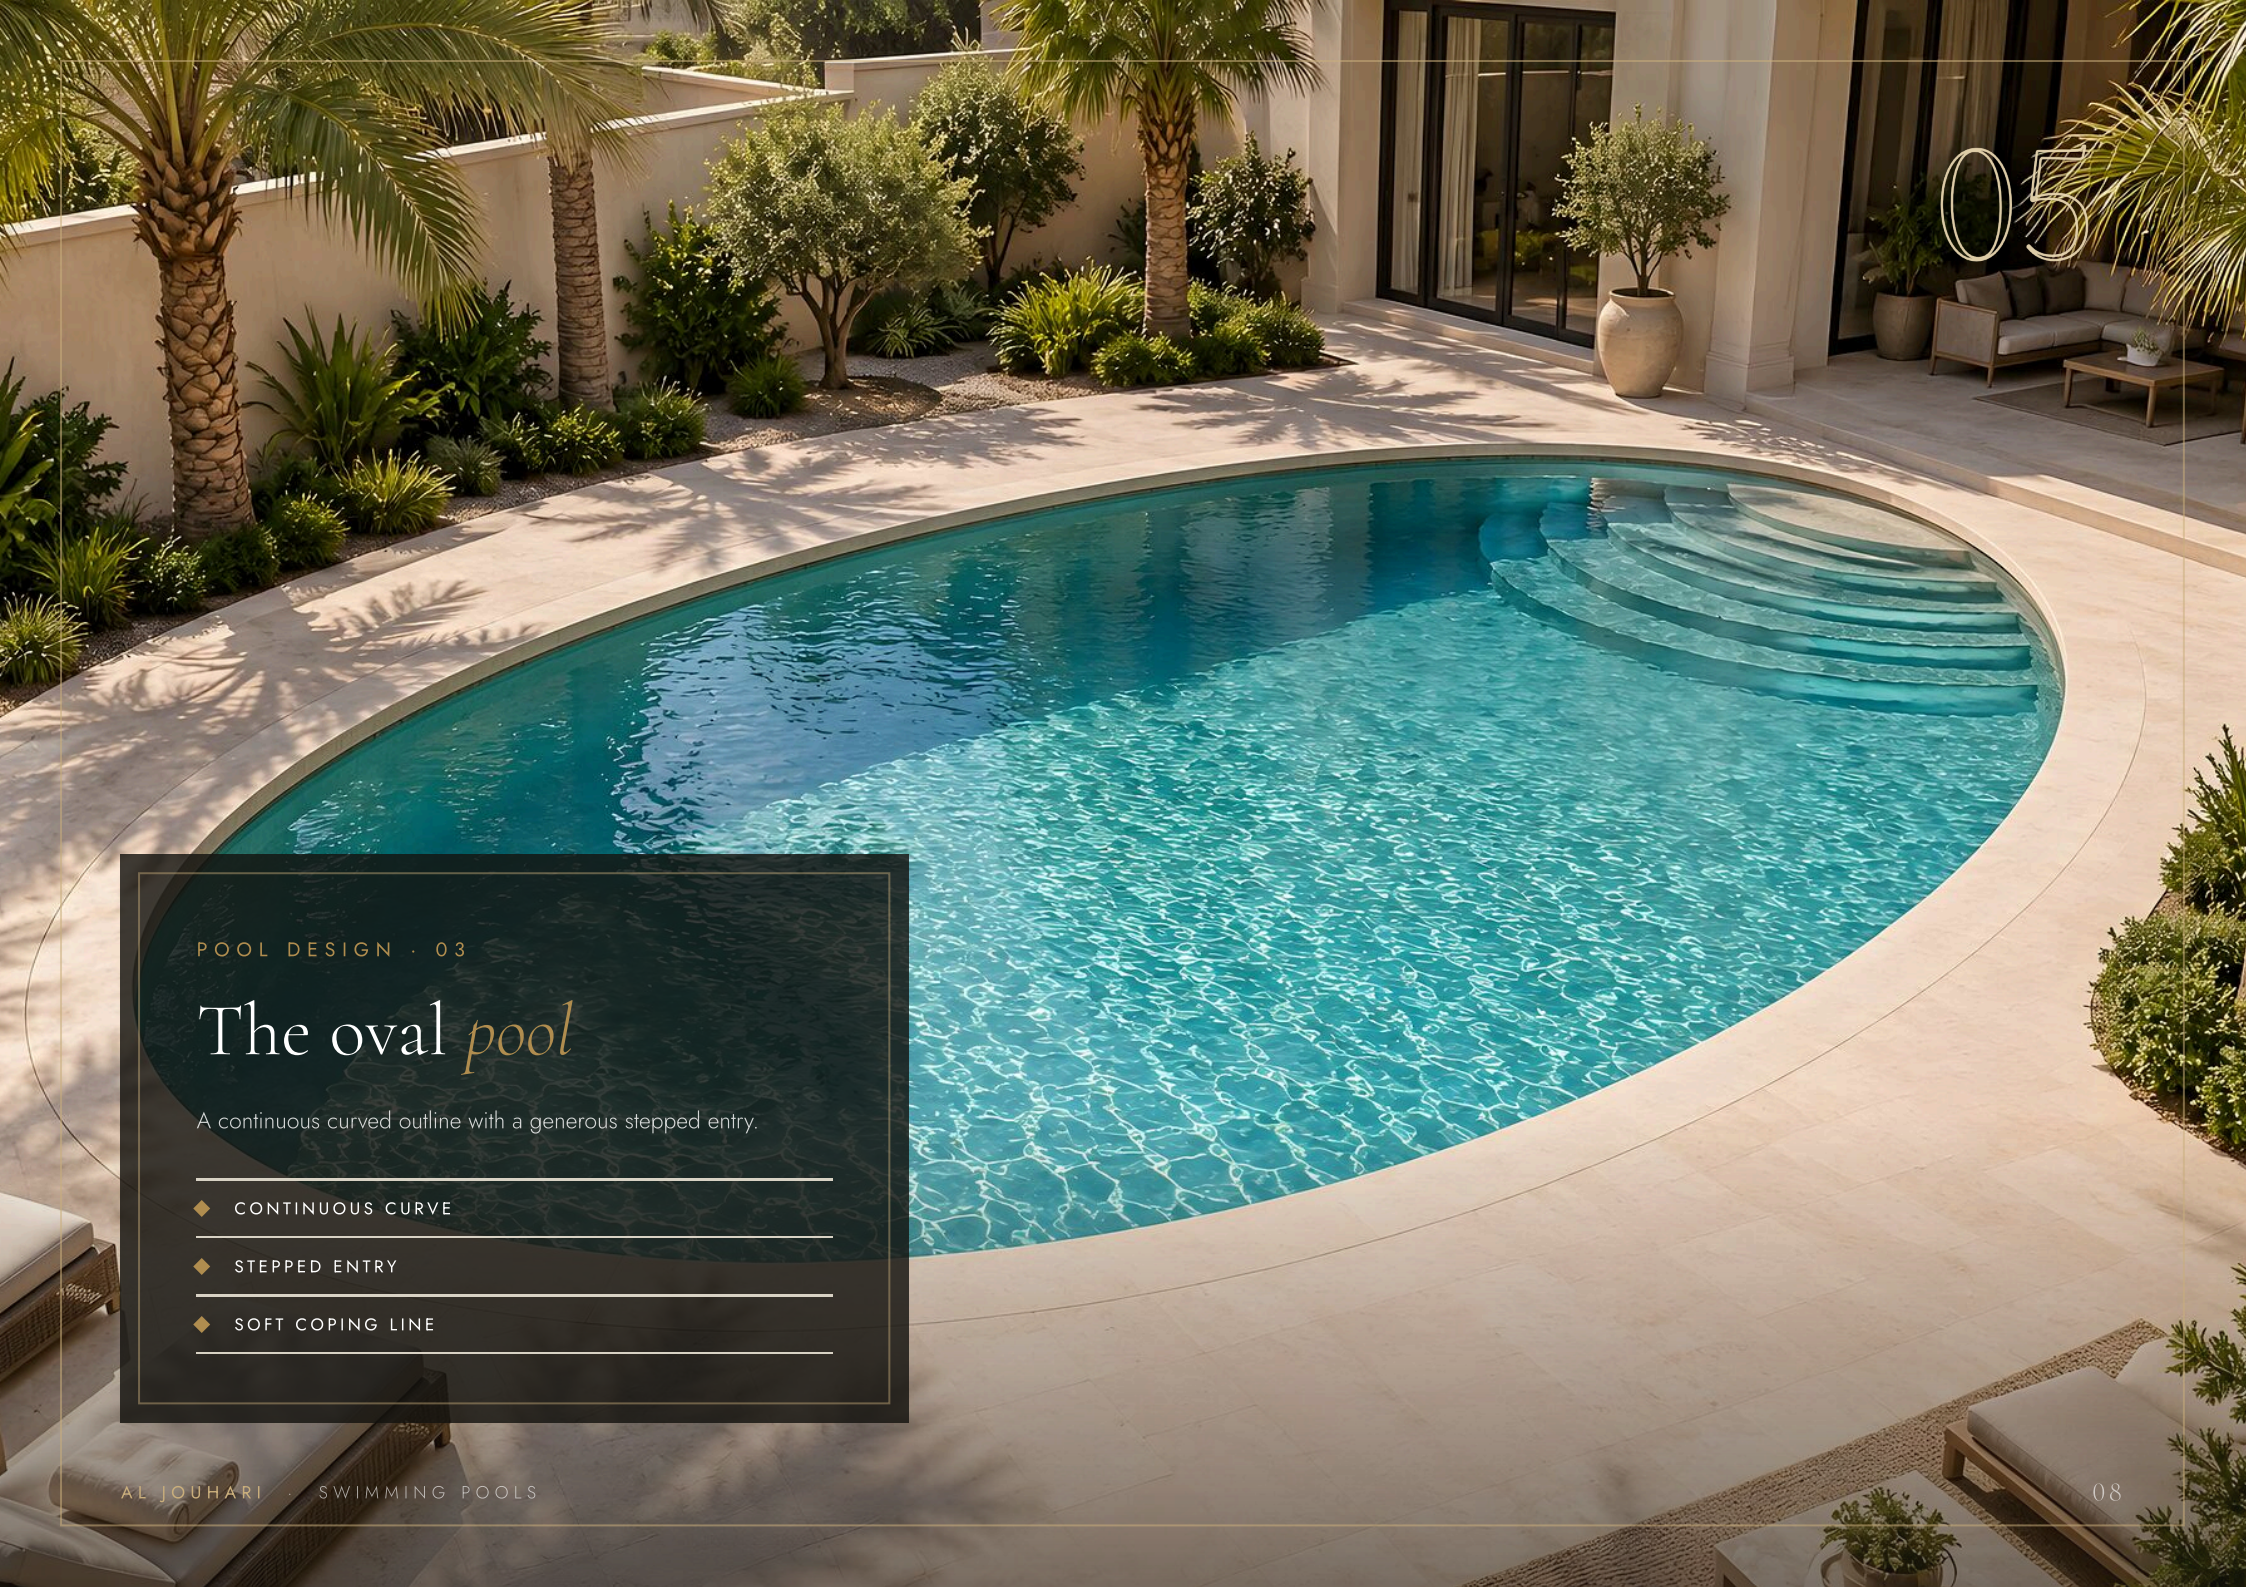

04

POOL DESIGN · 02

Family pool, *end zone*

A rectangular pool with an integrated shallow children's area at one end.

- RECTANGULAR PLAN
- CHILDREN'S AREA AT ONE END
- GENEROUS TERRACE

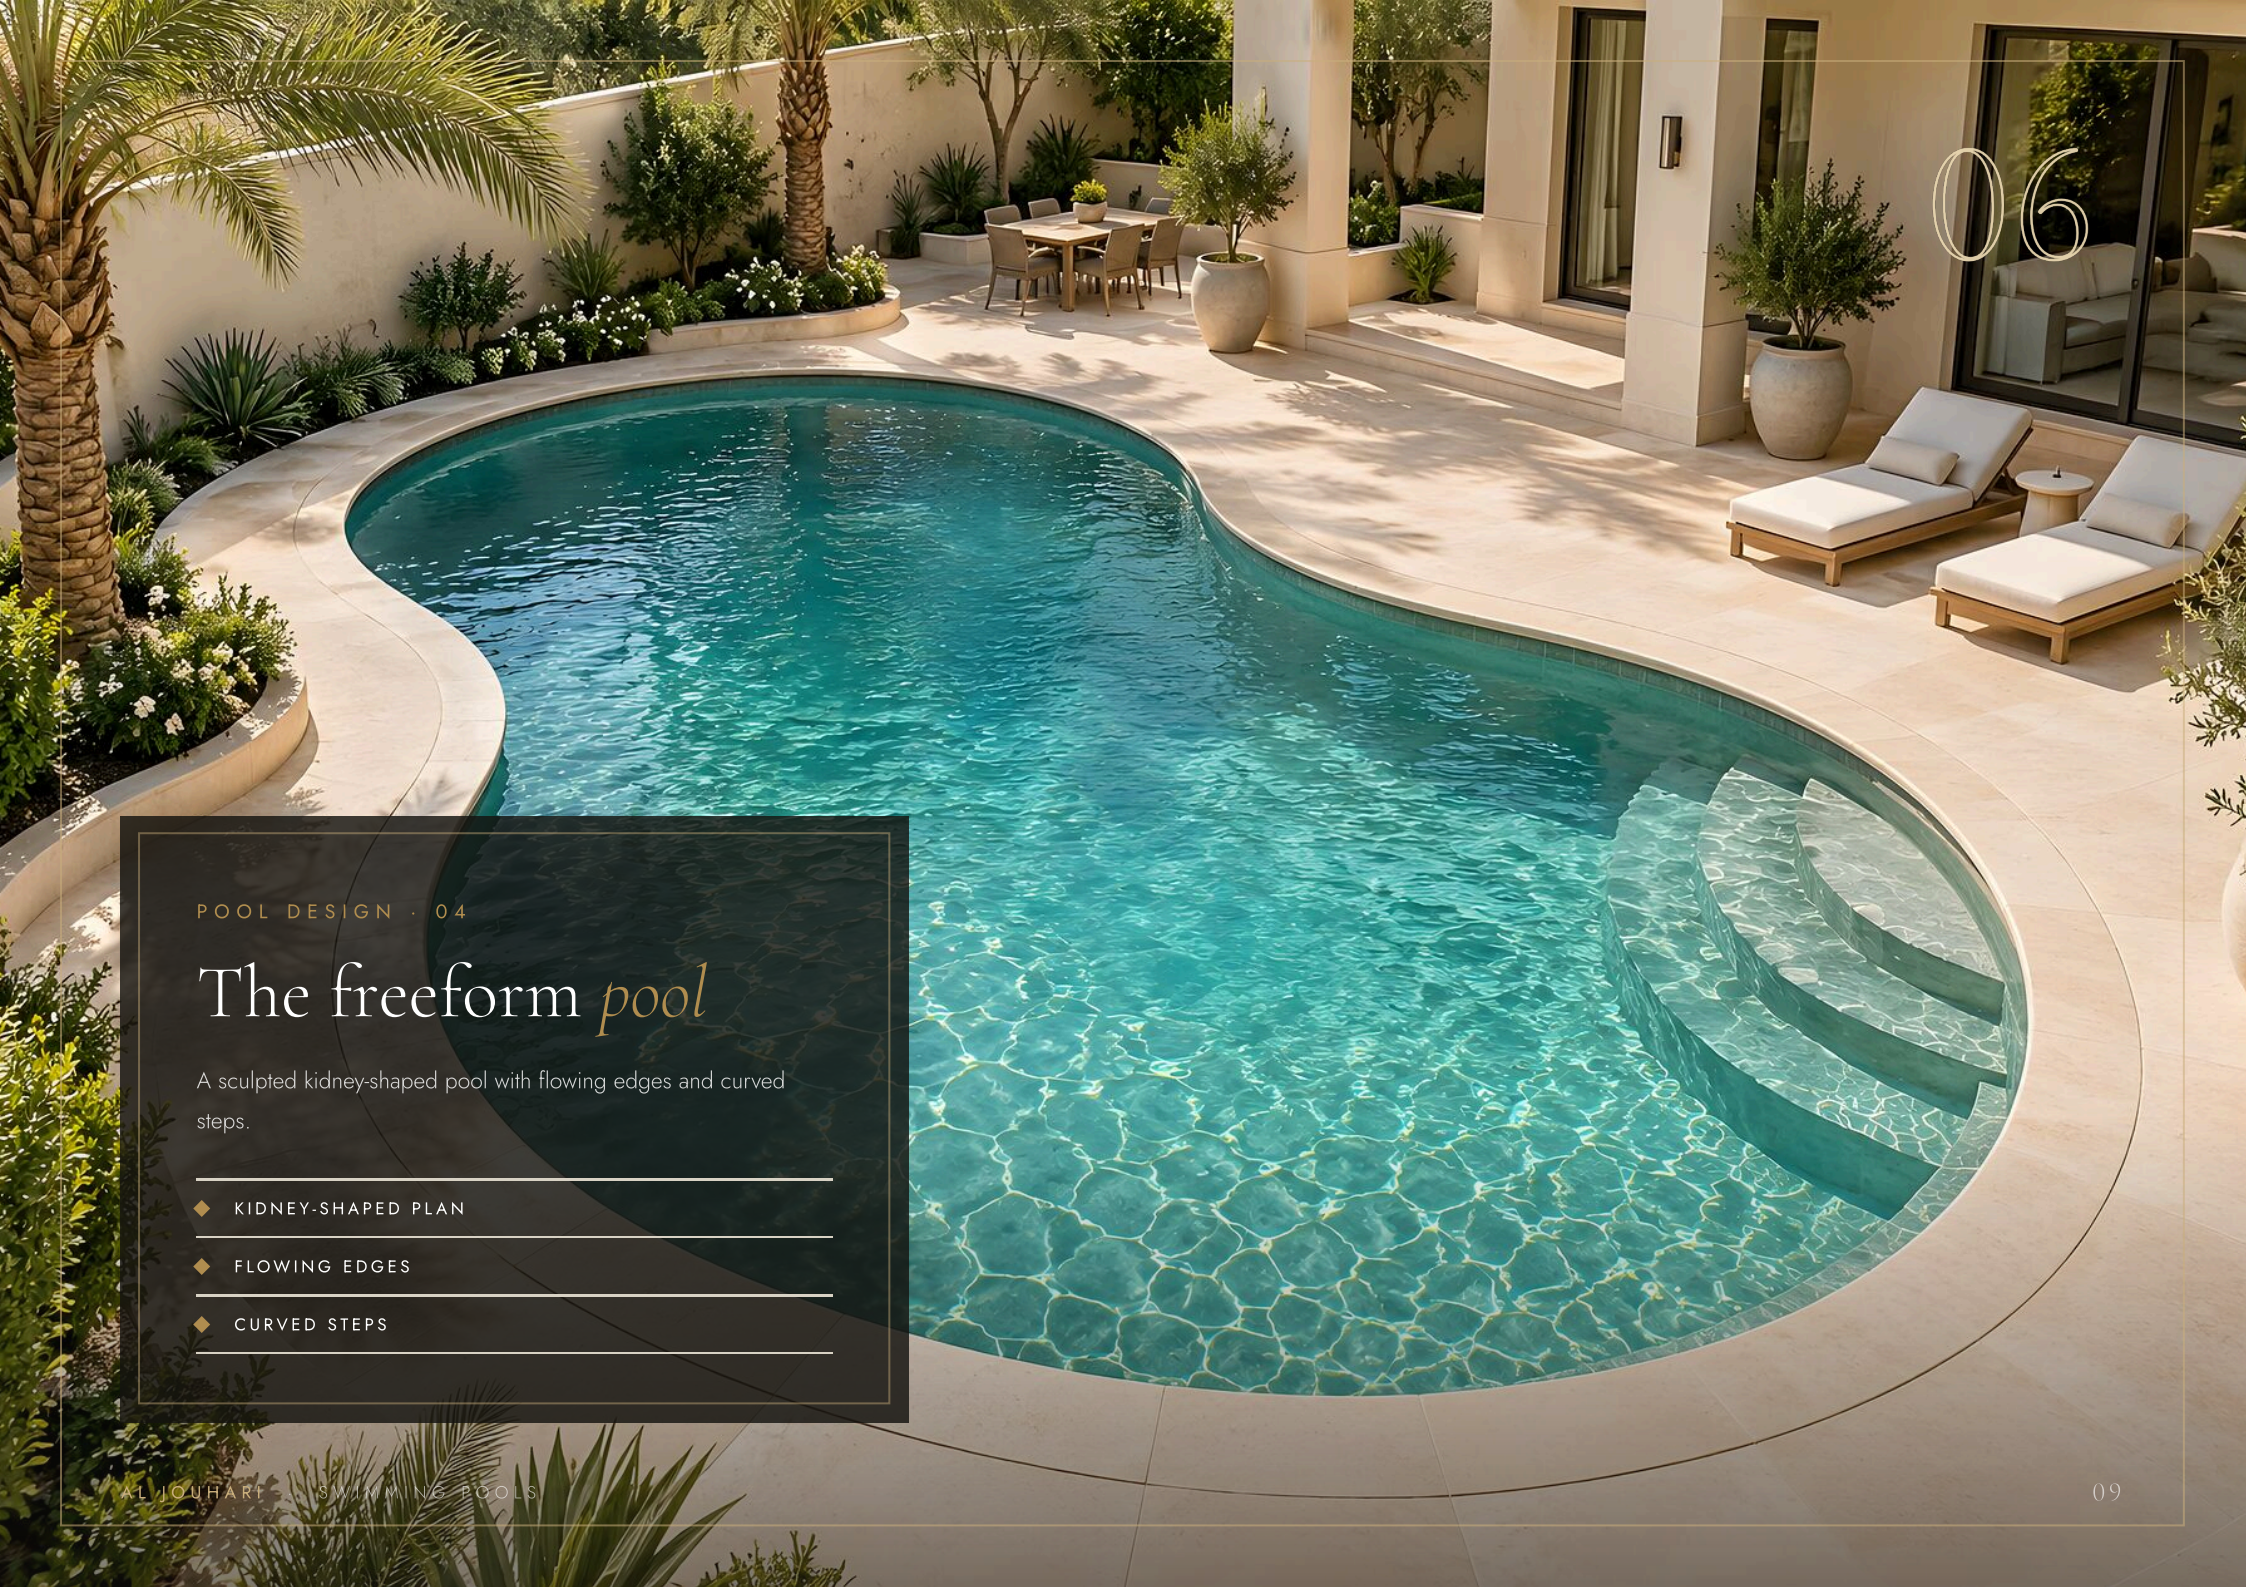

05

POOL DESIGN · 03

The oval *pool*

A continuous curved outline with a generous stepped entry.

- CONTINUOUS CURVE
- STEPPED ENTRY
- SOFT COPING LINE

06

POOL DESIGN · 04

The freeform *pool*

A sculpted kidney-shaped pool with flowing edges and curved steps.

- KIDNEY-SHAPED PLAN
- FLOWING EDGES
- CURVED STEPS

07

POOL DESIGN · 05

The square *pool*

A compact geometric layout with clean edges and corner entry steps.

- GEOMETRIC LAYOUT
- CLEAN EDGES
- CORNER ENTRY STEPS

THE BUILD, STAGE BY STAGE

From excavation *to first swim.*

Every design in this catalogue is shown through the same six milestones, the sequence our team follows on site.

01

EXCAVATION

The outline is set out and dug to depth, steps shaped into the ground.

02

REINFORCEMENT & PIPEWORK

Steel cage, formwork and plumbing lines placed before the pour.

03

CONCRETE SHELL

The structural shell is cast, steps and all.

04

WATERPROOFING

A continuous membrane seals the shell.

05

TILING & COPING

Mosaic, coping stones and surrounding paving are laid.

06

FILLED & FINISHED

Filled, cleaned and dressed for the first swim.

The classic *pool*

Six milestones, from the first cut of the ground to a pool filled and dressed for the first swim.

THE BUILD · STAGE BY STAGE

Family pool, *side zone*

Six milestones, from the first cut of the ground to a pool filled and dressed for the first swim.

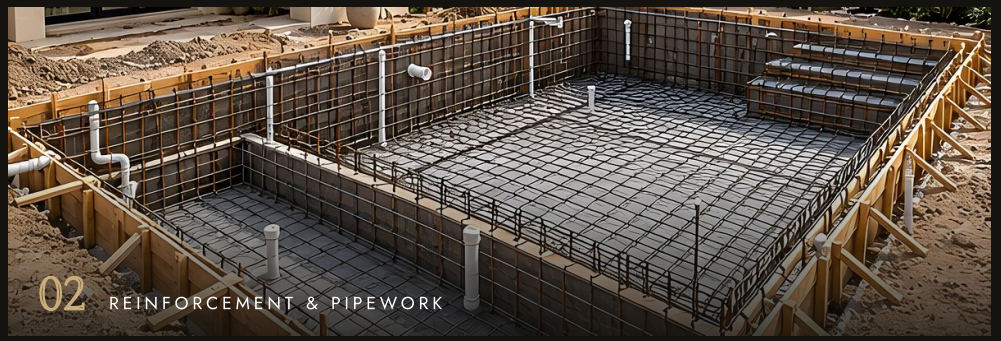

Family pool, *end zone*

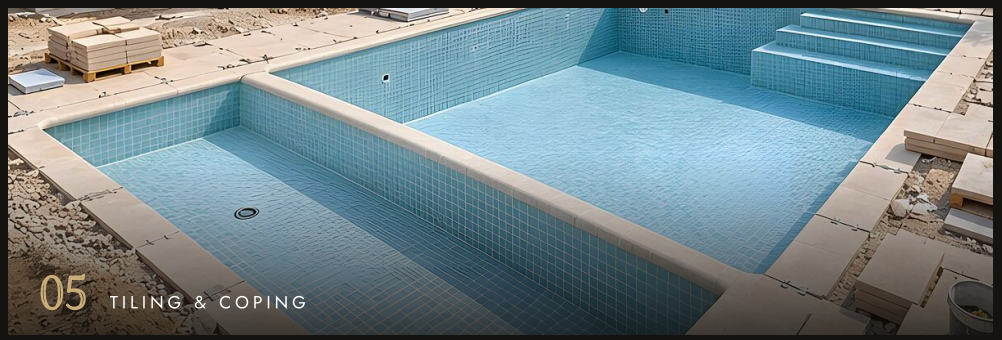

Six milestones, from the first cut of the ground to a pool filled and dressed for the first swim.

The oval *pool*

Six milestones, from the first cut of the ground to a pool filled and dressed for the first swim.

The freeform *pool*

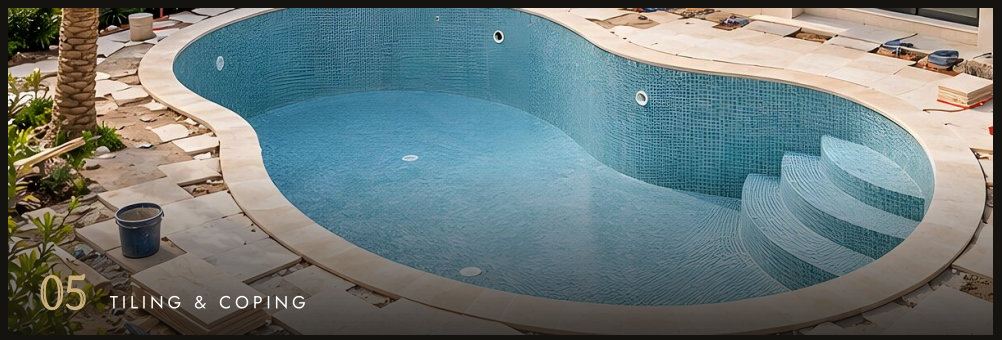

Six milestones, from the first cut of the ground to a pool filled and dressed for the first swim.

The square *pool*

Six milestones, from the first cut of the ground to a pool filled and dressed for the first swim.

OUTDOOR LIVING

After *dark.*

Pergolas, garden lounges and evening lighting complete the setting around the water.

Pergola pool courtyard

An intimate pool beneath a slatted pergola

Poolside outdoor living

Shaded terraces and step lighting

HOW WE WORK

One team, *first visit to first swim.*

A pool is concrete, waterproofing, plumbing, stone and tile, the same disciplines Al Jouhari delivers every day on industrial and commercial sites. Here they come together under one roof, with one point of accountability.

01 **Consultation & site visit**

We walk the site with you, understand how the pool will be used and take the measurements that shape the design.

02 **Design & layout**

Shape, depth, steps and children's areas are set out and agreed, with paving, lighting and planting in mind.

03 **Structure**

Excavation, reinforcement, pipework and the concrete shell, built by our own concrete and civil teams.

04 **Waterproofing**

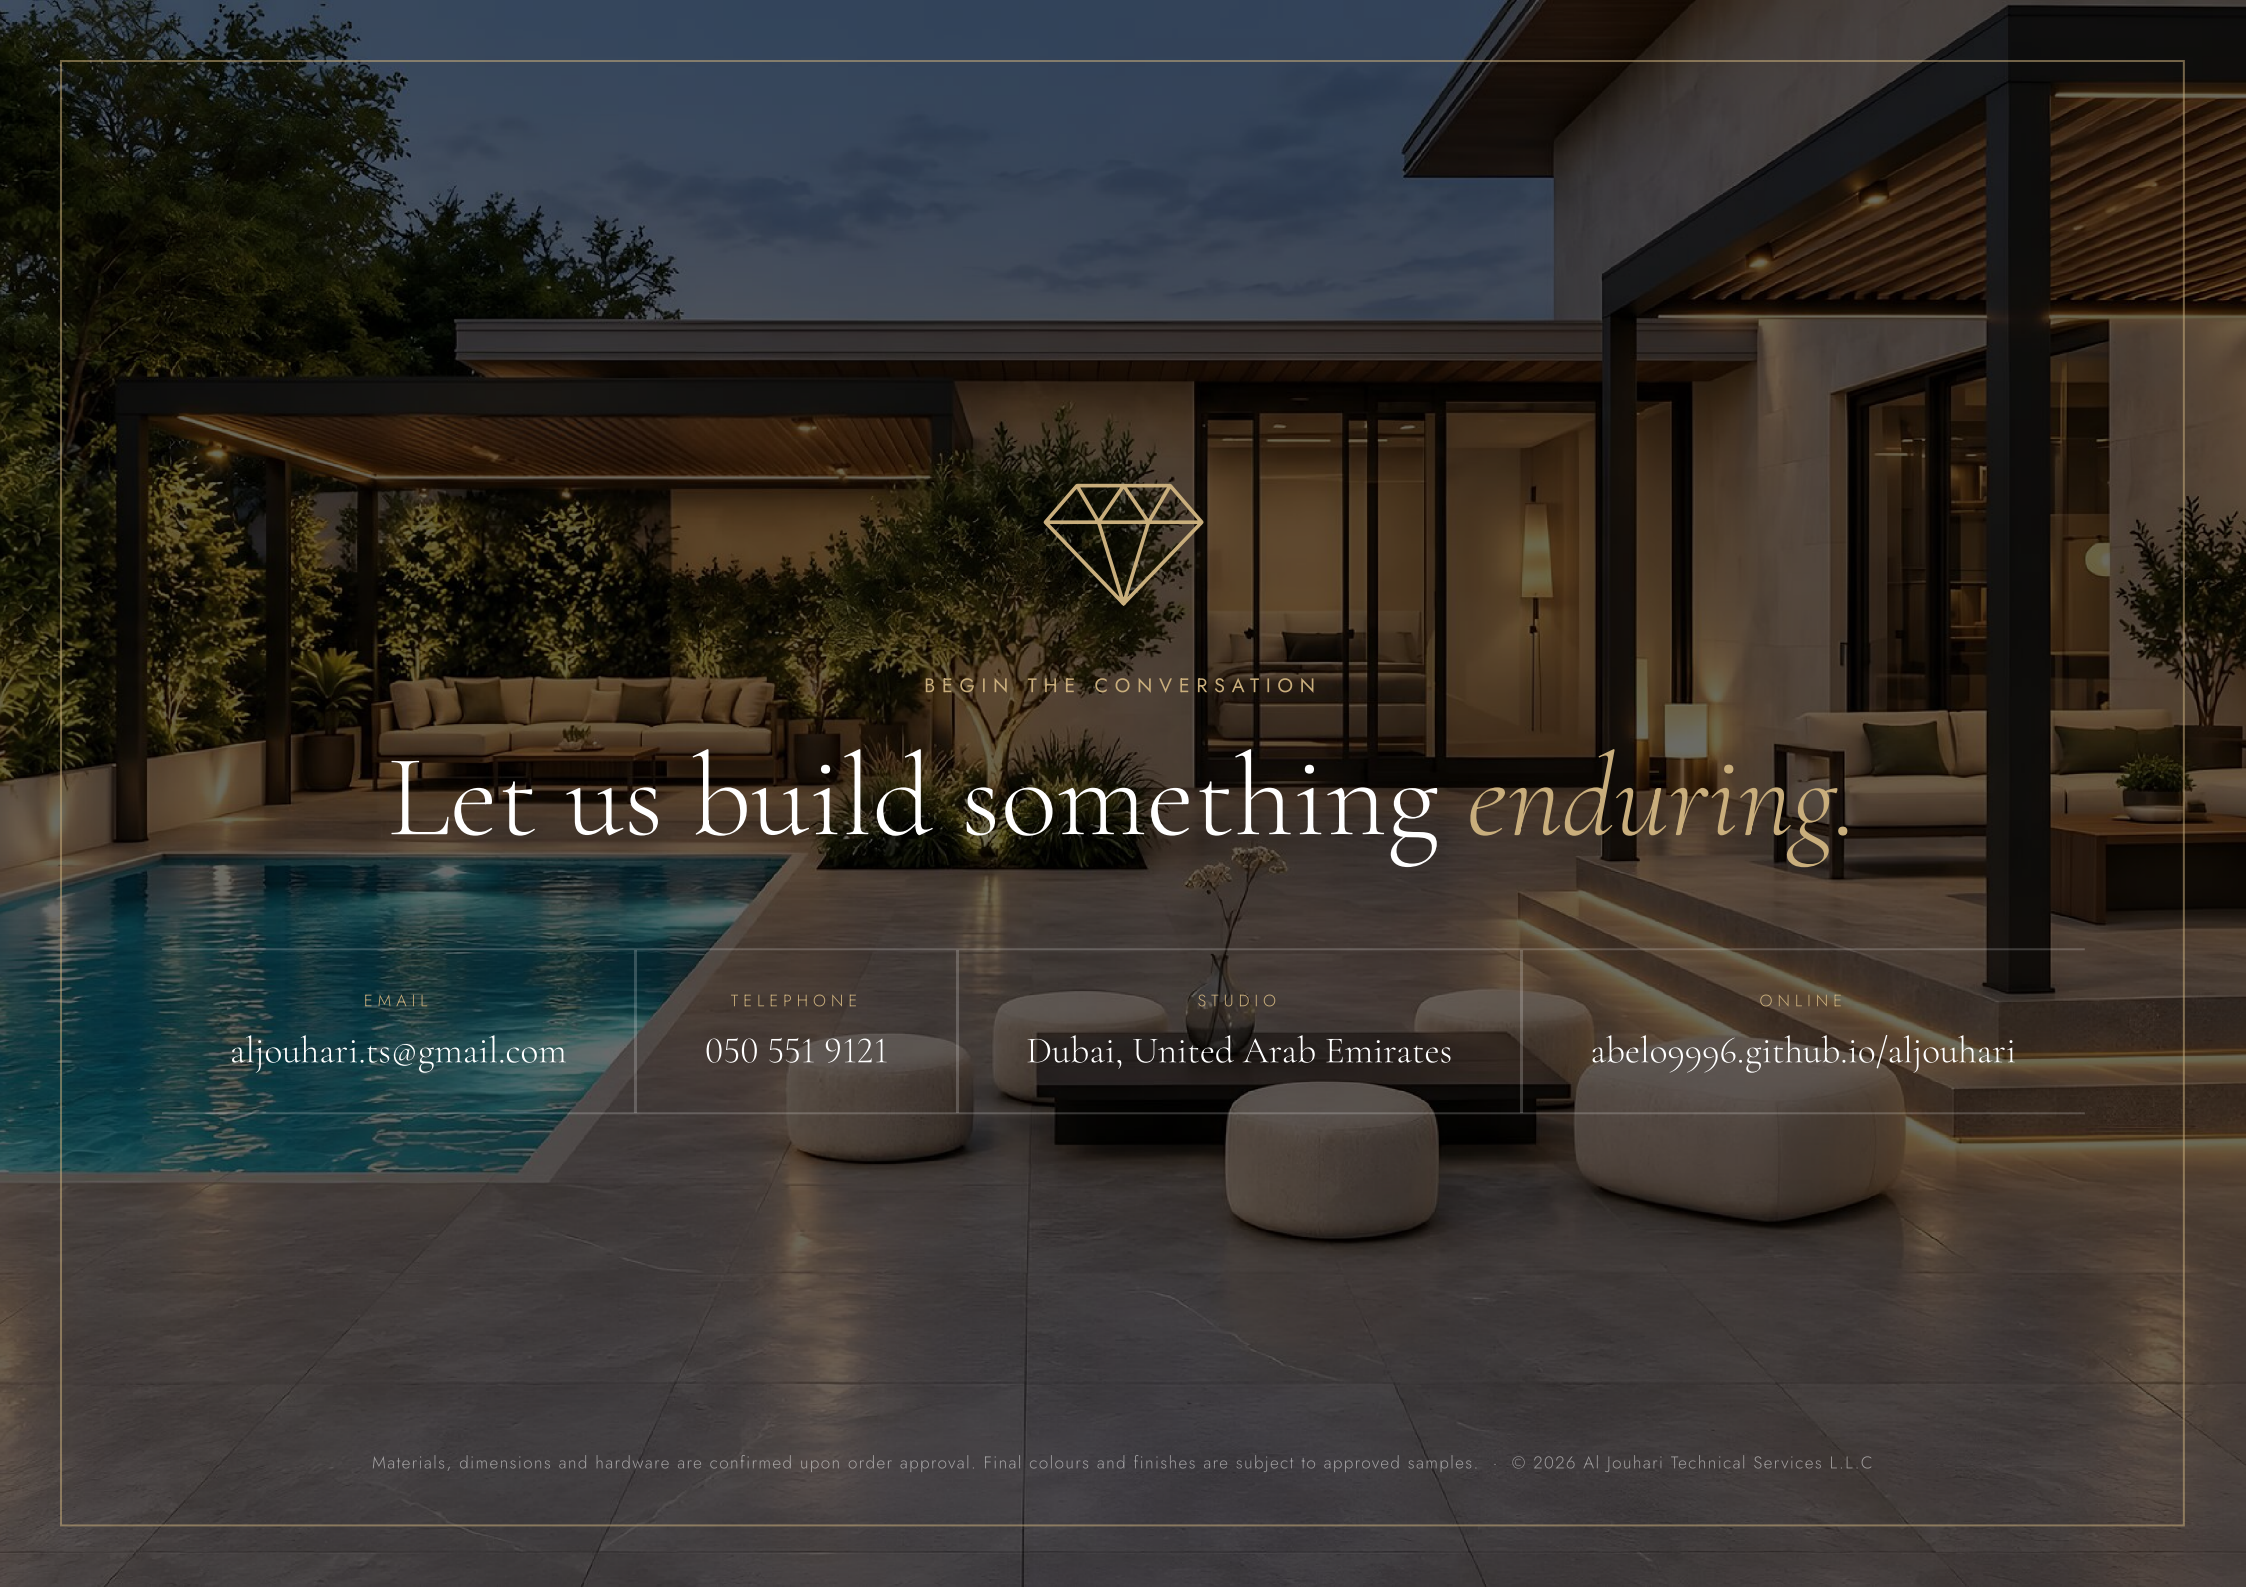

A continuous membrane seals the shell, delivered by the same specialists who waterproof roofs and basements across the UAE.

05 **Finishing**

Mosaic, coping, marble and surrounding paving, laid by our tiling and stone craftsmen.

06 **Handover**

The pool is filled, cleaned and handed over ready for the first swim, with one team accountable throughout.
