EDUCATION

University of California, Berkeley: B.A. Computer Science, B.A. Applied Mathematics

August 2018 - May 2022

Relevant Coursework: AI, ML, Computer Vision, Computer Security, Computer Architecture, Parallel Computers, Database Systems, Operating Systems, Data Structures, Algorithms, Stochastic Optimization, Discrete probability, Advanced Linear Algebra

Northwestern University: M.S. Computer Science

September 2022 - June 2023

Relevant Coursework: Deep Learning, Deep Learning in NLP, Deep Reinforcement Learning, Low-level/Kernel Software Development, Advanced Networking, Embedded Systems, CUDA Programming

University of Georgia, Athens: PhD Artificial Intelligence

August 2026 - Present

TECHNICAL SKILLS

- **Programming:** C++, C, Python, Java, Golang, Rust, PHP, Javascript, CUDA, SQL, MATLAB, R
- **Technologies:** PyTorch, Tensorflow, XGBoost, MPI, UPC++, SHMEM, MongoDB, Firebase, MySQL, Bash, Kubernetes, Docker, AWS, Google Cloud, Heroku, Node.js, React, Django, Flask, RISC-V, x86

WORK EXPERIENCE

Aivaro

Co-founder & CEO

March 2026 - June 2026

- Founded and leading development of an AI-driven workflow execution platform enabling small and medium-sized businesses (SMBs) — a core component of the U.S. economy — to automate revenue-critical operations across tools (Gmail, Stripe, Google Sheets, Calendly, etc.).
- Architected a deterministic LLM-to-workflow system that converts natural language into structured, executable DAGs with built-in reliability (retries, monitoring, approval gating).
- Deployed in a commercial SMB environment, automating booking, payment, and reconciliation workflows, reducing manual effort by 5 hours/week and lowering no-shows from 20–25% to 8%.
- Selected into Y Combinator (Spring 2026), a highly selective startup accelerator (<2% acceptance rate), recognizing the novelty and commercial potential of the platform.

C3.ai

Senior Data Scientist

May 2024 - March 2026

- Lead data science initiatives in predictive maintenance and generative AI across large-scale customer deployments (Shell, ExxonMobil, Dow, Bloom Energy). **Directed pilots delivering over \$10M in value and deploying over 1,000 models per project.**
- Developed a foundational healthcare transformer model using EHR data for customer deployment, **trained on 1M+ U.S. patient records and 1B+ anonymized datapoints**, establishing state-of-the-art performance in clinical AI.
- Created *SpeedyREL*, an internal tool accelerating collaboration between data scientists and subject matter experts in deploying semi-supervised reconstruction-based predictive maintenance models. **Adopted by 5+ projects, reducing deployment timelines by up to 50%.** Incorporated into official onboarding and training materials for all C3.ai's Reliability teams.
- Promoted to Senior Data Scientist in under 18 months for consistent delivery of high-impact customer solutions and contributions to core product development.

FibonAI

Co-founder

June 2023 - March 2024

- Designed and wrote source code for a SaaS platform, providing a comprehensive LLM-powered workspace for in-house corporate legal teams, integrating tools for intake & triage, contract management, matter management, and AI assistants.
- Successfully **onboarded 8 General Counsels/Chief Legal Officers** at large in-house corporate legal departments. Achieved organic acquisition of 2 more customers to the waitlist.
- Demonstrated **60% conversion rate** during product demonstrations and achieved **100% weekly user growth rate**.
- Accepted into UC Berkeley's SkyDeck Pad-13 Incubator Program, competing against 5,000+ startups globally.

RESEARCH/PROJECTS

Lawrence Berkeley National Laboratory: Pagoda Project Group

Research Contributor

June 2022 - April 2023

- Developed and deployed an automated performance regression testing platform for UPC++, a C++ library for writing efficient and scalable parallel programs on distributed-memory parallel computers, using C++, UPC++, Python, and Shell scripts.
- Implemented distributed hashing algorithm benchmark in UPC++ and compared performance against other available parallel-programming libraries, such as MPI and SHMEM.

HONORS & PUBLICATIONS

- Summa Cum Laude Honors at Northwestern University
- **Reviewed 175+ papers** for Elsevier's *Engineering & Applications of AI*, *Neural Nets*, and *Vision Computing* publication journals
- **Yagubyan, A.;** Garcia, D. *Embedding of Programming IDEs into Computer-Based Testing Software* (ACM SIGCSE, March 2022)
